

Composition

This product allows you to start a connected installation in your home.

Gateway module

	U	P consumption	F
-5°C +45°C	100-240V~ 50/60Hz	2W MAX	2,4 à 2,4835Ghz <100 mW

Installation step by step

- 1 Choose a location for the Gateway module, in the electrical cabinet:

If an internet box is present in the house, check with a smartphone that the Wifi signal level is sufficient. If the signal is not enough, try to bring the internet box to the electrical panel or add a WiFi repeater at the installation.

Imperative security precaution

The instructions for installation and use must be strictly observed in order to avoid the risk of electric shock or fire.

2 Install the Gateway module in the electrical cabinet

Turn OFF the power at
general circuit breaker

3 Complete your connected installation with additional products (not included in this pack):

Wire wired products using the individual instructions provided in the packaging of each of them.

The Legrand ecosystem is growing regularly, do not hesitate to consult the website legrand.com to keep you informed.

4 Configure the connected installation

* In order to restart all connected products at the same time.

** After wiring the installation, refit the front plate so that no active live part is accessible.

5 Finalize the installation in the Legrand Home + Control app

Download the Home + Control App and follow the instructions for adding the connected product in your setup.

You also have the option of controlling your installation via a voice assistant and can customize your scenarios via the Home + Control App.

UE SIMPLIFIED DECLARATION OF CONFORMITY

The undersigned,

Legrand

declares that the radio equipment listed on this instruction sheet are compliant to the directive 2014/53/UE.

The full text of the UE declaration of conformity is available at the following website:
